All properties according to Pankaboard measurements

L&W and DIN stiffness values are derived from Taber and should be treated as indication only

Test climate 23°C / 50%RH (according to ISO 187). Tolerances based upon 95% confidence limits, apply to reel average.

In order to verify, reel average shall be based on 5 single measurements randomly sampled within the reel. These averages will be for at least 19 of 20 reels within the specification limits.
